

JOB OFFER

Maintenance and installation engineer

Maintenance and installation engineer

Maintenance and installation Engineer

The Microwave Vision Group (MVG) combines the technological expertise, product portfolios and infrastructures of four leaders in the Antenna and EMC testing industry: SATIMO, ORBIT/FR, AEMI and Rainford EMC Systems. MVG specializes in antenna measurement solutions using multi-probe technology. ORBIT/FR specializes in antenna, RCS, and Radome measurements using advanced positioning systems. AEMI (Advanced ElectroMagnetics, Inc) is among the top industry leaders in the design of RF absorbers and REMC is a leader in the shielding and chambers designed for EMC testing, anechoic free zones, and data protection. With over 350 employees worldwide, we've joined forces to meet our clients' every need. Our offices, located in 13 countries, include project management, sales and after-sales service. Our solutions support the Aerospace & Defense, Satellite, Telecommunications, and Automotive industries, as well as Universities and Institutional Research and Material Manufacturers.

Microwave vision Group has an opportunity for a Maintenance and installation Engineer. The Maintenance and installation Engineer will report to Maintenance Manager and will be in charge of calibration and system installation on site. He participates to curative and preventive maintenance actions. The contents of the work will be delivery, installation, after-sales service, proofreading, etc. of the equipment manufactured by the Microwave Vision Group to the Japanese customers all over the world.

Bachelors or Master Degree or University Degree in electronic engineering or equivalent experience. Strong working knowledge in radiofrequency. Autonomy, ability to multitask and work effectively in a fast-paced environment is critical. Candidates should have team spirit, problem solving, and communication skills for successful inter-group and intra-group interactions. This position involves high frequency travel particularly. English requested (communication with France, Israel, USA...).
