+ Description

Broadband pyramidal absorber is manufactured in two basic geometries, depending on size and performance requirements:

- Conventional right pyramid
- Hollow Pyramid

The AEP-04 to AEP-24 & AEP-60 - AEP-72 absorbers are a conventional pyramid with a square base of uniform thickness, tapered to a point.

AEP-36H & AEP-48H are available in Hollow version only

- Total weight is reduced by 30%
- Enhanced performances at lower frequencies

Increase durability & lifespan by adding our rubberized coating!
