

QC Technician | UAN – 95382B

Department: Quality Control / Quality Assurance

Location: Office / MVG Israel (Emek Hefer)

Type: Full-time

About the Role

As a QC Technician at MVG, you will support product and process quality activities across manufacturing, laboratory operations, and the supply chain lifecycle. You will play a key role in ensuring inspection accuracy, calibration compliance, nonconformance control, and adherence to customer requirements, company procedures, and applicable quality standards. This role is ideal for a detail-oriented quality professional with hands-on experience in technical inspections, documentation, and manufacturing environments.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test, validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

- Ensure incoming, in-process, and final inspections are performed accurately before product shipment.
- Implement defined test procedures and verify that inspection results are properly recorded and documented.
- Manage nonconformities by reporting deviations, segregating rejected products, and escalating issues according to quality procedures.
- Collaborate with QA engineering, production teams, suppliers, subcontractors, and engineering teams to resolve quality deviations.
- Oversee immediate correction actions with internal teams and suppliers to support effective containment and follow-up.
- Ensure measuring tools are maintained and calibration validity is controlled internally and externally.

Requirements

- Technical diploma or relevant certification in Quality, Electronics, Mechanical Engineering, Industrial Engineering, or a related field.
- 3–5 years of experience in Quality Control, Manufacturing, or Industrial environments.
- Hands-on experience with inspection tools, measuring equipment, and calibration processes.
- Ability to read and interpret technical drawings, procedures, and specifications.
- Familiarity with quality systems, non-conformance management, corrective action processes, and ERP or quality management systems.
- Strong attention to detail, analytical thinking, organizational skills, documentation discipline, and problem-solving capabilities.
- Good written and verbal English communication skills, with the ability to work independently and communicate cross-functionally.

Nice to Have

- Knowledge of ISO 9001:2015 or other relevant quality standards.
- Experience in regulated or high-technology manufacturing environments.
- Basic understanding of root cause analysis methodologies.
- Availability for occasional travel to suppliers or subcontractors.

How to Apply

Send your CV and a short cover note to careers@mvg-world.com with the subject line: 95382B - QC Technician. We review applications on a rolling basis and aim to respond within two weeks. We look forward to hearing from you!

MVG - Testing Connectivity for a Wireless World
