

Position to be filled

KTP Associate in RF / Microwave Engineering

KTP Associate in RF / Microwave Engineering

MVG Industries

The Microwave Vision Group (MVG) develops cutting-edge technologies for the visualization of electromagnetic waves. By improving the speed and accuracy of wireless connectivity testing, as well as the performance and reliability of anechoic and EMC technologies, our systems have a crucial role to play in addressing test challenges in an interconnected mode.

The Group employs nearly 450 people and operates from 12 subsidiaries around the world to deliver to the most prestigious customers in the Telecom (Huawei, Samsung, Sony, etc.), Aeronautics (Thales, Boeing,...), Space (Space X,...) and Automotive (BMW, Peugeot, Renault,...) sectors.

Its turnover exceeds €100 million and is spread between Asia, the United States and Europe with continuous growth for many years.

MVG is a growing group looking for talent to continue its story.

To support our growth and carry out our innovative projects we are working with the University of Liverpool (UK) to start a 3-year R&D post for the development of Reverberation Chambers.
