

Responsable / Superviseur du Laboratoire de Production | UAN – 1957DE

Department: Production / Laboratoire de production

Location: Office / MVG Industries (Villejust)

Type: Full-time

About the Role

As Responsable / Superviseur du Laboratoire de Production, you will organize, coordinate and monitor production laboratory activities including testing, integration, preparation, calibration and conformity control. Reporting to the Production Manager, you will play a key role in ensuring equipment quality, traceability, on-time delivery and customer satisfaction. This role is suited to a rigorous, hands-on technical leader with experience coordinating laboratory or production test activities involving RF components and technical equipment.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test,

validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

- Lead the daily organization and task allocation of the production laboratory team, ensuring priorities are aligned with the production schedule.
- Manage testing, integration, preparation and calibration activities for equipment including enclosures, antennas, dosimeters and laboratory devices.
- Ensure equipment conformity before integration, delivery or customer return by applying defined control, validation and compliance procedures.
- Oversee testing and tracking of critical components, including RF components, amplifiers and couplers, to reduce integration or preparation errors.
- Drive accurate traceability of tests, controls, calibrations, validations and conformity certificates.
- Collaborate with production, quality, methods, technical, logistics and sales administration teams to follow orders, customer returns and blocking points.
- Optimize laboratory organization, documentation and follow-up processes to improve operational performance and reliability.

Requirements

- Proven experience in production, laboratory testing, integration, calibration or conformity control activities.
- Strong ability to coordinate a team, manage daily priorities and follow several technical activities in parallel.
- Knowledge of control, validation, compliance and traceability procedures in a production or laboratory environment.
- Technical knowledge of antennas, dosimeters, enclosures, laboratory devices and related test activities.
- Familiarity with RF components, amplifiers, couplers and critical component identification, referencing and follow-up.
- Ability to identify defects, anomalies and non-conformities and escalate or propose corrective actions.
- Ability to draft conformity certificates and complete technical documentation accurately and reliably.

Nice to Have

- Experience in a high-tech environment related to antenna measurement, RF, EMC or similar instrumentation sectors.
- Strong continuous-improvement mindset with the ability to improve laboratory workflows, tracking documents and procedures.
- Clear communication skills for working with production management and cross-functional teams.
- Customer-return or calibration/étalonnage experience for technical equipment.

How to Apply

Send your CV and a short cover note to careers@mvg-world.com with the subject line: 1957DE - Responsable / Superviseur du Laboratoire de Production. We review applications on a rolling basis and aim to respond within two weeks. We look forward to hearing from you!

MVG - Testing Connectivity for a Wireless World
