

Project Manager | UAN - B0A382

Department: Project Management / Programs

Location: Villejust, France

Type: Full Time

About the Role

We're looking for an EMEA/APAC Project Manager based in Villejust to lead the end-to-end execution of complex customer projects from contract signature through delivery, installation, and customer acceptance. In this role, you will act as the primary customer interface while coordinating cross-functional teams across engineering and operations to deliver projects on time, within budget, and to high quality standards. This is a strong opportunity for a technically minded project leader who wants to develop in both program leadership and system engineering within antenna measurement technologies.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test, validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

Lead end-to-end project execution from contract signature to final customer acceptance, ensuring delivery on time, on cost, and on quality.

Define and manage project structure, including WBS/OBS, delegation to System Engineering, and coordination of engineering work packages.

Act as the main customer point of contact after contract signature, managing expectations, satisfaction, change requests, and contract add-ons with Sales.

Coordinate Engineering, Operations, Quality, external partners, subcontractors, and work package leaders across multiple MVG sites.

Monitor project performance, including schedule, cost, margin, risks, billing, revenues, cash flow, and contingencies, and implement corrective actions.

Ensure compliance with technical requirements, challenge proposed solutions when needed, and support system engineering and solution definition activities.

Lead problem-solving initiatives, oversee MVG quality gates, and support preparation and execution of key installation stages.

Requirements*

Master's degree in Electrical Engineering or a related field.

2–5 years of experience in project management or engineering roles.

Strong project management capabilities, including planning, budgeting, risk management, and the ability to manage multiple projects simultaneously.

Solid understanding of RF/antenna technologies or willingness to develop expertise.

Ability to coordinate and influence cross-functional and international teams without direct authority.

Ability to read technical documentation and schematics, troubleshoot systems, and work with common software tools including MS Office and MS Project.

Excellent written and verbal communication skills in English, with a customer-oriented, proactive, autonomous, and results-driven mindset.

Nice to Have

Experience in RF, antennas, or measurement systems.

Multi-disciplinary technical experience in mechanical, electrical, or EMC domains.

Familiarity with test instruments such as network analyzers or spectrum analyzers.

French, German, or Italian language skills, plus experience with programs subject to European defense regulations and security vetting.

How to Apply

Send your CV and a short cover note to careers@mvg-world.com with the subject line: Project Manager – Application. For questions or more information, contact Joseph Moore. We look forward to hearing from you!
