

Quality Assurance Manager – Multi Probe and Antennas Product Line | UAN – 6B90A4

Department: Quality Assurance / Manufacturing Quality

Location: Office / MVG Industries (Villejust)

Type: Unlimited contract

About the Role

The Quality Assurance Manager will implement and maintain the Quality Management System at product line level for MVG's Multi Probe and Antennas product lines in Villejust, France. This role ensures compliance with corporate quality standards and customer requirements while driving audits, investigations, CAPA processes, and continuous improvement. It is ideal for an experienced QA or Manufacturing Quality professional with strong audit, root cause analysis, and cross-functional leadership skills.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test,

validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

- Implement corporate quality procedures across relevant operational facilities and customer-site installations.
- Maintain product line quality documentation in line with corporate standards and customer requirements.
- Lead internal audits and support external audits conducted by certification bodies and customers.
- Drive root cause analysis activities using structured methodologies such as 8D and 5 Whys.
- Manage CAPA processes, follow-up actions, and timely resolution of quality issues.
- Monitor and report product line quality KPIs to support visibility, decision-making, and improvement.
- Train operators and QC personnel on quality requirements, process discipline, and documentation expectations.

Requirements

- Bachelor's degree in Engineering or a related technical field.
- 3–8+ years of experience in Quality Assurance or Manufacturing Quality, preferably in an industrial or manufacturing environment.
- Strong knowledge of Quality Management System standards such as ISO 9001 or AS9100.
- Proven experience leading audits, customer investigations, and quality-related assessments.
- Advanced experience with root cause analysis methodologies and CAPA management.
- Strong analytical, problem-solving, communication, and reporting skills.
- High attention to detail, process discipline, and ability to lead cross-functional discussions.

Nice to Have

- Experience supporting quality activities for complex technical products, installations, or customer-site environments.
- Familiarity with antenna measurement, RF, EMC, RCS, or other high-tech industrial sectors.
- Demonstrated ability to drive continuous improvement initiatives across operations and quality teams.

How to Apply

Send your CV and a short cover note to careers@mvg-world.com with the subject line: UANXXXX - Quality Assurance Manager – Multi Probe and Antennas Product Line. We review applications on a rolling basis and aim to respond within two weeks. We look forward to hearing from you!
