

R&D Project Manager | UAN - 01202D

Department: R&D Product and Process

Location: Pomezia, Italy / Villejust, France

Type: Full-time

About the Role

We're looking for an R&D Project Manager to join our R&D Product and Process team and contribute to the management and technical development of MVG's research and innovation initiatives. In this role, you will help coordinate advanced antenna and measurement software projects, collaborate with international engineering teams, and support the continued growth of our antenna innovation and design activities. This is a great opportunity for someone passionate about RF technologies, antenna measurement systems, and multicultural project environments.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test, validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

Manage and support R&D projects from early concept through development, execution, and completion.

Contribute to the technical development of research and innovation initiatives within the R&D Product and Process team.

Collaborate with engineers across mechanics, software, electronics, signal processing, marketing, engineering, and purchasing teams.

Define, monitor, and track project budgets, resources, milestones, and deliverables.

Support the strategic direction of MVG's technology roadmap as the team expands internationally.

Drive effective project coordination using established project management and process engineering tools.

Participate in meetings, conferences, and occasional travel to other MVG sites as required.

Requirements*

University degree in Electrical Engineering or an equivalent technical field.

Practical working experience in highly innovative R&D environments, university research, or a newly graduated profile with demonstrated management skills.

Ability to work independently while contributing effectively in a strong team-oriented and collaborative environment.

Good written and oral communication skills in English, which is required within MVG.

Valid working permit for the European Union.

Willingness to be based at the MVG office in Pomezia, Italy or Villejust, France, and to indicate workplace preference in the application.

Willingness to occasionally travel to other MVG sites and participate in meetings and conferences outside the office location.

Nice to Have

Solid knowledge of conducted and radiated RF domains.

Experience in project management or process engineering using project management tools.

Experience with antenna measurement systems and technologies such as Near Field, Far Field, Compact Range, and RCS.

Familiarity with basic programming languages such as MATLAB or Python, and communication skills in French or Italian.

How to Apply

Send your CV and a short cover note to careers@mvg-world.com with the subject line: R&D Project Manager – Application. Please indicate your preferred workplace, Pomezia, Italy or Villejust, France, in your application. For questions or more information, contact Lars Foged, Ludovic Durand, or Karine Barriant.
