

## New Products Manager | UAN - D81D97

**Department: Research & Development (R&D)**

**Location: MVG-ORBIT/FR Engineering Ltd., Israel**

**Type: Full Time**

---

### **About the Role**

We're looking for a New Products Manager to join MVG's R&D team and contribute to the management and technical development of its research and innovation initiatives. In this role, you will support new product activities, collaborate across technical domains, and progressively take on responsibility for leading R&D projects from concept to completion. This is a strong opportunity for an RF-minded engineer with project-management potential who wants to help shape MVG's technology roadmap and growth.

### **About MVG**

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test, validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

---

## Responsibilities

Lead new product initiatives within the R&D department, from early concept through development and delivery.

Develop and coordinate technical plans that support MVG's research and innovation roadmap.

Drive collaboration between engineering domains, including mechanics, software, electronics, signal processing, marketing, engineering, and purchasing.

Ensure project activities are aligned with technical objectives, budgets, resources, and business priorities.

Manage communication with international teams and contribute to a multicultural, multinational working environment.

Oversee progress tracking and help future R&D projects move from conception to completion.

## Requirements

University degree in electrical engineering or equivalent.

Practical experience in highly innovative R&D environments or a recent graduate profile with demonstrated management skills.

Strong ability to work independently and within a collaborative, team-oriented environment.

Good written and oral communication skills in English.

Valid working permit for the European Union.

## Nice to Have

Solid knowledge of conducted and radiated RF domains and/or RF systems engineering.

Experience in project management or process engineering using project-management tools.

Experience with antenna and/or RCS measurement systems and technologies, including Near Field, Far Field, and Compact Range.

Familiarity with basic programming languages such as MATLAB and Python, plus knowledge of defining and tracking budgets and resources.

## How to Apply

Send your CV and a short cover note to [careers@mvg-world.com](mailto:careers@mvg-world.com) with the subject line: New Products Manager – Application. For questions or more information, contact Lars Foged, Ludovic Durand, or Dalia Smadar. We look forward to hearing from you!
