

Project Manager | UAN - 72CCB8

Department: Project Management / Programs APAC

Location: Kawasaki, Japan

Type: Full-time

About the Role

We're looking for a Project Manager based in Japan to lead the end-to-end execution of complex customer projects from contract signature through delivery, installation, and customer acceptance. In this role, you will act as the primary customer interface while coordinating MVG teams, local subcontractors, manufacturers, logistics, and importation processes in Japan. This is a strong opportunity for a hands-on project leader who wants to grow in program leadership and antenna measurement expertise within an international, high-tech environment.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test, validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

Lead end-to-end project execution from contract signature to final customer acceptance, ensuring delivery on time, on cost, and on quality.

Define and manage the project structure, including WBS and delegation to System Engineering.

Act as the main point of contact for customers after contract signature, managing expectations and alignment between customer and MVG teams.

Coordinate Engineering, Operations, Quality, external partners, local subcontractors, manufacturers, logistics, and importation processes in Japan.

Monitor project performance, including schedule, cost, margin, risks, billing, revenues, cash flow, and financial opportunities.

Support system engineering activities, customer site readiness, installation preparation, on-site commissioning, and acceptance testing for smaller projects.

Handle and negotiate change requests and contract add-ons in coordination with Sales.

Requirements

Bachelor's or Master's degree in Electrical Engineering, Mechanical Engineering, or a related field.

3–6 years of experience in project management or engineering roles.

Strong project management capabilities, including planning, budgeting, risk management, and ability to manage multiple projects simultaneously.

Solid understanding of RF/antenna technologies or willingness to develop expertise.

Experience working in cross-functional and international environments.

Proficiency with MS Office, MS Project, and common software tools.

Excellent written and verbal communication skills in English, with a customer-oriented, hands-on, flexible, and autonomous mindset.

Nice to Have

Experience in RF, antennas, or measurement systems.

Experience in aerospace or defense industries in Japan.

Multi-disciplinary technical experience in mechanical, electrical, or EMC domains.

Familiarity with test instruments such as network analyzers or spectrum analyzers.

How to Apply

Send your CV and a short cover note to dalia.smadar@mvg-world.com with the subject line: Project Manager – Japan – Application. Please mention the reference JOB.86.2.26.TYO.A in your application. We look forward to hearing from you!
