

Project Manager - Japan | UAN – 72CCB8

Department: Programs / Project Management

Location: Office / MVG Japan (Kanagawa)

Type: Full-time

About the Role

As Project Manager based in Kawasaki, Japan, you will lead end-to-end execution of complex customer projects from contract signature through delivery, installation, and customer acceptance. You will act as the primary customer interface while coordinating engineering, operations, quality, subcontractors, logistics, and importation activities to ensure projects are delivered on time, within budget, and to MVG quality standards. This role is ideal for a hands-on project leader with strong technical understanding who wants to grow in program leadership and antenna measurement systems.

About MVG

MVG – Microwave Vision Group – is the global leader in electromagnetic field measurement solutions. With 400+ employees, offices across 4 continents, and over 25 years of consecutive growth, we help the world's most innovative companies test, validate, and push the boundaries of wireless technology. Our mission: Testing Connectivity for a Wireless World.

Join us to shape the future.

Responsibilities

- Lead full contract execution from signature to final customer acceptance, ensuring delivery on time, on cost, and on quality.
 - Define and manage project structure, WBS, schedules, budgets, risks, margins, and corrective action plans.
 - Manage customer communication, expectations, change requests, and contract additions in coordination with Sales.
 - Collaborate with Engineering, Operations, Quality, external partners, local subcontractors, and manufacturers to drive project execution.
 - Oversee local Japan interfaces, including subcontractors, logistics, importation processes, and customer site readiness.
 - Ensure technical and operational alignment by supporting system engineering activities, installation preparation, commissioning, and acceptance testing.
 - Optimize financial performance by tracking billing, revenues, costs, cash flow, margin, risks, and opportunities throughout the project lifecycle.
-

Requirements

- Bachelor's or Master's degree in Electrical Engineering, Mechanical Engineering, or a related technical field.
 - 3–6 years of experience in project management or engineering roles, ideally involving complex technical systems.
 - Strong project management capabilities, including planning, budgeting, risk management, cost tracking, and multi-project coordination.
 - Solid understanding of RF/antenna technologies or willingness to develop expertise in antenna measurement systems.
 - Ability to work effectively in cross-functional and international environments with engineering, operations, quality, customers, and subcontractors.
 - Excellent written and verbal communication skills in English, with a customer-oriented and autonomous working style.
 - Proficiency with MS Office, MS Project, common software tools, and ability to read technical documentation, schematics, and troubleshoot systems.
-

Nice to Have

- Experience in RF, antennas, EMC, or measurement systems.
- Experience in aerospace or defense industries in Japan, including awareness of regulated program environments.
- Familiarity with test instruments such as network analyzers and spectrum analyzers.
- Multi-disciplinary technical experience across mechanical, electrical, software, systems, or EMC domains.

How to Apply

Send your CV and a short cover note to careers@mvg-world.com with the subject line: 72CCB8 - Project Manager - Japan. We review applications on a rolling basis and aim to respond within two weeks. We look forward to hearing from you!

MVG - Testing Connectivity for a Wireless World
